Fall Credit Courses

Sections, Seats, and Enrollment

The number of seats offered in Fall has decreased by 4.4% from Fall 2008 to Fall 2011. This is in contrast to the annual number of seats available which decreased by 13.7% from 2008 – 2009 to 2011 – 2012. Meanwhile the number of enrollments increased beyond the official number of seats available, so that the overall college fill rate is greater than 100%.

Notes: These counts exclude noncredit, non-graded dependent courses, and alternate versions of concurrent courses. When a section did not have an enrollment limit, the actual enrollment was used as the number of seats offered.
